

## EDITORIAL OF THE PRESIDENT

A Beautiful National of breeding has just ended. The participation is decreasing in the sector of the exhibition, but our race resists, with a reduction less important than the global trend. 2014 will stay in annals for the good atmosphere of this demonstration and it thanks to the irreproachable organization of the team of the Charente around the Staff of Alain Fouillen and Jean-François Vignaud. The season of Tan begins, it is an important period when we discover the "Health" of the race by its participation and its quality, the club will be attentive to the good progress of these tests. The implementation of three new events for young Pointers in summer which has to be of use as foot to the stirrup to discover new talents and encourage to the presentation in Field. And already will be the end of this summer season which ends with our Finale so desired and a summer Derby. Our looks are going to turn to the Alps which are going to welcome an absent European championship for a long time of our mountains.

A race which progresses and which pushes our Pointer men to the optimism.

*Pierre Avellan*

## FOCUS ON...

**The interview of Ioannis Foutris to come in the next review**, an article which clicks as a thunderclap but which in the résonance of an alarm bell, a thorough subject full of passion and sincerity on the cynophilie and the Pointer. An alert which has to urge us to have another look on the GQ and our race. Ioannis Foutris recognized as one of the big cynophile of these last decades among which the experience and the skills are incontestated in Europe without tie in a chapel or a flag, one vision of the Pointer which exceeds the borders to plan ahead with this notion of responsibility of the heritage which represents the management of a race. Ioannis judges our Pointers with " the Rifle in the shoulder ", never losing sight that the fundamental reason of our selection is only finally shot to the Hunting. He knew several periods, several schools, several teachers and his balance assessment has to return us to the reality. A GQ which undergoes an inflation of the profits and the qualifiers damaging our own system of selection. A testimony which has to help us and drive us towards an awareness, pushing a cynophilie which becomes global to obtain a harmonization of judgments, a discipline which must be refocused to become again the indisputable melting pot of our parents. Clubs, judges are not there to boil a pot to make progress an economic system. In this spiral the indulgence becomes dangerous because it makes us "every" culprits with regard to the breeders which(who) we shall remove one day their confidence(trust)...

## DELEGATE INTERVIEW

**JEAN-GUY DESTENABES, delegate of Landes and region South Aquitaine, what brought you to take responsibilities within the club?**

**JGD:** the delegation of Landes is traditionally a region rich in pointers, it is thus quite naturally that pushed by some friends, I agreed to take up the challenge. I succeeded of my predecessor for the organization of the special of fielt-trial to Herm and Escource and also some TAN in South Aquitaine.

**You organize together with the club of the English setter the TAN of South Aquitaine, can you tell us two words?**

**JGD:** in front of the difficulty of finding grounds of suitable quality for a selection, we owed, and this since a few years, to mutualize with the club of the English setter our collaboration.

Over time was established a big complicity.

It is not rare to see drivers of Setters coming to see evolving our Pointers and vice versa.

This year we agreed with Jean Louis Duperrier, the delegate of the Setter, to organize a big weekend around our two races.

On Saturday, August 2<sup>nd</sup>, TAN with a special evening from the Landes (bandas, demonstration of pelota and meal).

The conviviality, the exchange are the key words of this common day.

**According to you, what are the essential actions of the delegate to gather the users of Pointer?**

**JGD:** the delegate owes be present on a maximum of events (fields, exhibitions, etc.).

He has to go towards the users of Pointers.

Especially the delegate has to be attuned, he has to keep in mind that the great majority of pointer men are hunters, he thus has a very big role of adviser.
